

Here are just a few of thousands of testimonials about ICAN's Patient Services...

"...I've had extensive experience working with a variety of oncologists, scientists in various disciplines, and advocates assisting the victims of cancer...One of the most dedicated, productive, resourceful, creative, and overall brilliant advocates for cancer victims that I've ever had the pleasure of knowing and assisting is (ICAN's CEO) Marcia K. Horn. She leads...with great expertise and productivity."

G. Robert Pettit, Ph.D. • Regents Professor, Arizona State University

Cancer Research and Medicinal Chemistry

Dr. Pettit is one of the world's most prolific discoverers of anticancer drugs for human cancer treatment.

When my husband was diagnosed with NSCLC my life went into shock and hyperdrive at the same time. I was bent on getting him the best information out there to reassure us both that we had access to the best team and the best medicines and best techniques available. I always referred to this disease as "we have cancer." I put all my friends to task as well, and one very special friend directed me to ICAN. It was the culmination of the search for credible and accessible information, including the doctors and the medicines that we needed. Thank you beyond all thank you's, ICAN, for your perseverance in supporting all of us suffering from this disease and the phenomenal work you are doing.

The Barbara Cussler Lung Cancer Patient Advocacy Program at ICAN

A dear friend in Colorado was diagnosed with a very lethal cancer during her first trimester of pregnancy. Thank goodness we knew about ICAN and suggested that she call. Almost immediately, ICAN set her up with leading surgical and medical oncologists, helping to arrange appointments within days. Not only did ICAN take the lead on the substantive patient services and advocacy end, but ICAN also guided this patient in obtaining free psychological counseling to help her through the trauma of having been diagnosed during pregnancy.

If you need the best in patient advocacy, where an organization pulls out all the stops--on a patient-by-patient basis-- then you need dial only ICAN. But right now, the demand for ICAN services is far outweighing the revenues needed to keep up with that demand. Please give and give big so they can continue their amazing advocacy and extending the lives of patients, as they've done for the life of my friend. Please support ICAN!

The Kay T. DeMichele Breast Cancer Patient Advocacy Program

Thank you so much for your time, compassion, and understanding. You have helped my sister and my family so much already, by giving us HOPE! It is something never to be undervalued. I felt comforted by your staff's extensive knowledge of pancreatic cancer, and I was so moved by your positive can-do outlook. I love ICAN! Don't stop. You are doing amazing work!

ICAN Pancreatic Cancer Patient Advocacy Program

My husband's life was extended - no question about it - by ICAN. They not only helped us find the most appropriate clinical trial for his esophageal cancer, they helped us get him into the trial, which stabilized him for some time. Although he ultimately lost the battle, there is no doubt in my mind that were it not for ICAN, my husband would have missed the precious time he ended up sharing with our children and me. All praise to ICAN. We could not have done it without you. You are a blessing in every desperate cancer patient's life.
